Profile

Software Engineer with 10+ years of experience designing, building, and scaling cloud-native backend systems. Skilled in developing resilient, high-throughput microservices using Java and Spring Boot.

Experience

LeoVegas Group Stockholm, Sweden
Backend Engineer Sep 2022 - Present

- Developed and maintained 60+ gaming microservices processing 20M+ transactions daily, ensuring secure, accurate, and high availability, low-latency player transaction handling.
- Led a backend engineering squad in the Gaming team, responsible for integrating and maintaining third-party gaming providers into the platform, enabling seamless game launches, wallet transactions, and consistent end-to-end gameplay flows.
- Implemented regulatory and compliance changes across multiple markets, ensuring wallet and gaming services consistently met jurisdiction-specific regulations and reporting standards.
- Mentored and onboarded 3 engineers through structured knowledge-sharing and hands-on support, enabling successful first production pull requests within days of joining.
- Collaborated closely with Product, Compliance, QA, and Engineering teams to design and deliver new wallet features and platform enhancements, with a strong focus on security, correctness, reliability, and scalability.

Kindred Group Plc Stockholm, Sweden
Software Engineer Java Feb 2020 - Aug 2022

- Designed and developed 2 game provider integrations, implementing game launch and wallet APIs using Java, Spring Boot, Solace, Caffeine, and Oracle, enabling the successful rollout of 200+ games in Germany and the Netherlands.
- Built a real-time live games feed service using WebSockets enhancing game lobby and driving a 7% increase in customer gameplay across multiple markets.
- Developed and maintained backend microservices for game launch, game sessions, wallet transactions, and player rewards, ensuring seamless integrations, high availability, and regulatory compliance across multiple regulated markets.
- Implemented application health, traffic, and transaction monitoring using Grafana and Splunk, creating dashboards and alerts to track gameplay and wallet activity across 60+ markets, improving operational visibility and incident response.
- Led the development of an internal back-office tool using Java, Spring Boot, JavaScript, and Thymeleaf, empowering marketing teams to create promotional offers and improve customer engagement and retention.
- Acted as Agile Lead and Incident Manager (rotational), facilitating daily stand-ups, retrospectives, and incident coordination.

IBM Pune, India

Senior System Engineer Sep 2019 - Jan 2020

- Developed a microservice to do bookings for a US-based hospitality client using Java, Play framework, and Couchbase.
- Ensured code quality with test coverage above 90% using Mockito, JUnit, and SonarQube.
- Communicated with internal stakeholders to gather requirements, create implementation designs and ensure product feasibility.
- Performed code reviews and assisted developers with troubleshooting and defect resolution.

Atos Syntel Pune, India

Associate Consultant. Sep 2018 - Aug 2019

- Successfully delivered microservices to integrate enriched revenue data into a shipment management system for a US-based logistics client using Java, Spring Boot, Spring Cloud, Gradle, and Oracle.
- Led the development of secure, scalable REST APIs enabling shipment validation, rating, and invoicing capabilities.
- Collaborated closely with developers, QA, and cross-functional stakeholders to ensure high-quality releases and continuous delivery.
- Contributed to task breakdown, effort estimation, and planning for both development and maintenance activities.
- Provided post–go-live production support, rapidly diagnosing issues, performing root-cause analysis, and implementing fixes to minimise business impact.

Accenture Mumbai, India

Application Development Analyst Mar 2015 - Aug 2018

- Developed and delivered 10+ modules for retail and e-commerce web applications using Java, Spring MVC, MongoDB, and Maven.
- Designed and implemented an API mock response utility to stub external dependencies and ensure development continuity during network or service outages.
- Built comprehensive unit test suites using JUnit and Mockito, achieving 90%+ code coverage and improving code quality and stability.
- Debugged, analysed, and resolved application defects, improving reliability and reducing production issues.

Education

Uttar Pradesh Technical University Lucknow, India

Bachelor of Technology in Computer Science and Engineering Aug 2010 - Jun 2014

Skills

Java, Kotlin, Spring Boot, Microservices Architecture, Distributed Systems, REST APIs, Kafka, Event-Driven Architecture, Kubernetes, Docker, JPA (Hibernate), MySQL, Oracle, API Design & Integration, Monitoring & Alerting, Grafana, Splunk, CI/CD
